

COMPANY PROFILE

Engineering Excellence Across Africa

"We built Binvic to prove that African engineering firms can compete at the highest international standards, that safety and quality don't have to be compromised, and that hands-on leadership makes all the difference."

— Dennis Keenan, Founder & Managing Director

HOW IT BEGAN

Our Story

Binvic (Pty) Limited was founded on a straightforward principle: **treat every project as if the outcome were for your own use**. This philosophy has shaped every decision, every hire, and every project the company has delivered.

What started as a focused construction-related project execution firm quickly grew into a fully-integrated operation spanning civil, structural, mechanical, piping, electrical, and instrumentation disciplines. The founders brought decades of combined experience in mining, oil & gas, and industrial construction, and a shared conviction that the African continent deserved world-class engineering delivery.

From the start, Binvic's approach was different. Directors and senior managers don't just oversee projects from boardrooms; they participate in day-to-day execution. This hands-on leadership model ensures quality, safety, and accountability are embedded at every level.

The company's growth has been measured and deliberate. Rather than chasing volume, Binvic focused on building deep expertise, trusted relationships, and an impeccable safety record. The result: over **5 million lost-time injury free hours** on operations in Tanzania and Mozambique.

About Us

Delivering Complex Capital Projects Across Africa

Binvic (Pty) Limited is a fully-integrated project execution company delivering capital engineering and construction projects predominantly within the mining, industrial, and oil & gas sectors.

Our multi-disciplinary teams operate seamlessly across civil, structural, mechanical, piping, electrical, and instrumentation disciplines. With a hands-on approach where directors and senior managers participate in day-to-day execution, every project is treated as if the outcome were for Binvic's own use. That's how we've accumulated over 5 million lost-time injury free hours.

Our Vision

To be the most trusted construction and engineering partner in Africa — recognised for safety, quality, and the ability to deliver exceptional outcomes on every project.

Our Mission

Binvic (Pty) Limited is a fully-integrated project execution company delivering capital engineering and construction projects predominantly within the mining, industrial, and oil & gas sectors.

What we do

Solutions driving project excellence

Our multi-disciplinary teams deliver fully-integrated engineering and construction solutions, from feasibility studies through execution and commissioning, spanning the entire project lifecycle for mining, oil & gas, and industrial sectors.

- ✓ Civil Engineering
- ✓ Mechanical & Piping
- ✓ Structural Engineering
- ✓ Electrical & Instrumentation
- ✓ Power Infrastructure
- ✓ Modern Contracting
- ✓ Project Planning & Consulting
- ✓ Specialized Services

Featured Projects

Showcasing our track record of delivering complex projects across Africa

Kenmare Development Projects (WCPA Upgrade Initiative)

📍 Moma Mine, Nampula Province, Mozambique

📅 Oct 2024 – Mar 2026

WCPA and Early Works, Main Works for Nataka and Main Scope of Nataka Project. A SMPP FIDIC agreement for the provision and installation of a range of steel structures, including their mechanical parts, as well as HDPE and carbon steel piping.

SMO (Scavenger Mining Operation) — Mechanical & Piping Installation

📍 Moma Mine, Nampula Province, Mozambique

📅 Apr 2024 – Jul 2025

Completion of the Scavenger Mining Operation (SMO) plant project, managing the supply chain for all necessary components.

Flotation & Filtration Upgrade - FIDIC Contract

📍 Moatize, Mozambique

📅 Apr 2022 – Jan 2024

Oversaw the enhancement of flotation and filtration systems within mineral processing, significantly boosting overall efficiency and productivity. Delivered as an SMPP and E&I project under a FIDIC contract framework.

Our Safety Record

Independently audited to international standards for quality, environment, and occupational health & safety.

OUR COMMITMENT

**Safety Is
Not Just a
Priority**

It's a core value embedded in every project, every process, and every person at Binvic.
